FlexIS Plunger Cooling Control

Introduction
FlexIS Plunger Cooling Control is an optional control loop available in the FlexIS Timing (FlexIS 1, 2 and 3) using information from the TCS (Temperature Control System) or the BlankRadar. It gets the measured temperature values of the plunger surfaces and adjusts automatically the duration of the plunger cooling.

Depending on the machine type and configuration, up to 48 plungers are permanently monitored and adjusted to changes of surrounding parameters. This leads to more stable production runs and also prevents quality problems inside the container and finish.
Application
FlexIS Plunger Cooling Control is beneficial for NNPB, P&B and certain B&B productions.

Setting Description
FlexIS Plunger Cooling Control is fully integrated into the FlexIS controls. All settings are done on the User Console and are stored as job data. The user interface is very similar to the FlexIS Blank Cooling Control.

Settings (all per cavity)
- FlexIS Plunger Cooling Control on / off
- Setpoint value for temperature
- Upper and lower limits for cooling adjustment

Feedback to the user (all per cavity)
- Actual (measured) temperature
- FlexIS Plunger Cooling Control on / off (status)
- Cooling duration (event OFF-ON)
- Cooling duration reached upper or lower limit (status)

FlexIS 1 user interface: Setpoint values and measured values with colored status indication shown in the Settings Section page (sample values).
FlexIS 2 and 3 user interface: Setpoint values and measured values with colored status indication shown in the Closed Loop Adjustment page (sample values).

**Functions**
- See all values per section or grouped in an overview
- Fill values to all closed loops or to all sections

**Installation Requirements**
FlexIS Plunger Cooling Control can be ordered for any forming machine having:

- FlexIS 1 Timing Control - Software Version 1.07.03.038 or higher
- FlexIS Blank Cooling Control (TNB220)

**Order Information**
FlexIS Plunger Cooling Control includes:

- 601-20001-5  Software License FlexIS Plunger Cooling Control
- 1 day  Service engineer for installation
- 2 days  Production specialist for commissioning and on site training
Documentation
H11106_EN is the English manual of FlexIS Plunger Cooling Control for UC 1.
H11113_EN is the English manual of FlexIS Plunger Cooling Control for UC 2.

Feature/Benefits

<table>
<thead>
<tr>
<th>Features</th>
<th>Benefit</th>
